# DRILLING OPERATIONS & MANAGEMENT

## WHO WE ARE

Summit is the leader in managing the environmental regulatory and operational requirements associated with conventional and horizontal directional drilling, pipeline and utility installation operations.

We are the pioneer in the development of industry first innovations and technologies and geographically positioned to meet our customer's needs globally.

## WHAT WE OFFER

### DRILLING WASTE MANAGEMENT

We are experts in managing all forms of waste generated from oil and gas exploration, pipeline and utility installation, and mining exploration operations.

### ENVIRONMENT & REGULATORY

We are experienced in all environmental and regulatory requirements, notifications and submissions in Canada, Australia and USA.

### WATER MANAGEMENT

We understand the regulations and guidelines around the sourcing, tracking, monitoring and reporting requirements with respect to water.

### ASSOCIATED SERVICES

We are diversified and intelligently integrated making us qualified to manage additional related requirements.

Visit our website at [www.summitearth.com](http://www.summitearth.com)  
for additional information on Summit and the  
professional services we provide.

## OUR HISTORY

Since 2005, Summit has been the leader providing compliance management services and solutions. We are experts in all Canadian regulations and we have taken this expertise internationally and introduced proven compliance management solutions to Australia, the USA and Saudi Arabia.

We are also proud innovators who have delivered technologies that have revolutionized compliance management operations.

# From Insight to On-Site.

## OUR INNOVATION

Summit is the leader in the development of innovative technologies. Our patented Summit Earth Compliance Management System is the evolution in the management of drilling waste and water usage engineered to ensure compliance throughout drilling operations.

This proprietary system consists of the following technologies.

- Summit Earth Desktop
- Summit Earth Navigator
- Summit Earth H2O (In Development)

Summit Earth combines precision GPS guidance and automation with custom web-based GIS software to control drilling waste management operations and the use of water. This system is designed to eliminate recurring non-compliance issues and the costs associated with them.

## NAVIGATOR IN ACTION

Connect Summit Earth to any vacuum truck and our patented on-board system will control disposal operations and ensure compliance.

Summit Earth regulates disposal operations based on compliance parameters by monitoring and controlling;

- Boundaries of disposal and non-disposal areas.
- Proximity to water bodies and other additional hazards.
- Approved travel route and mapping.
- Regulated tank pressure.
- Slope measurement and exclusion.
- Application rate control.
- Disposal overlap.
