Welcome

To build a great company with exceptional people to preserve and restore our natural environment.

This is our purpose, cause, and passion. It's what we do better than anyone else. This concept is our internal compass and keeps us focused on our destination.

Summit brings this core focus to the oil and gas, energy and utilities, resources and mining and industrial sectors in an effort to restore our natural environment.

- ✓ **Turnkey Project Management expertise and history.** 10+ strategic partnerships, and diverse but integrated service capabilities.

Our proven history, project management experience and turnkey service offering makes us a valued partner in managing your liabilities in a cost-effective, collaborative and pragmatic fashion.

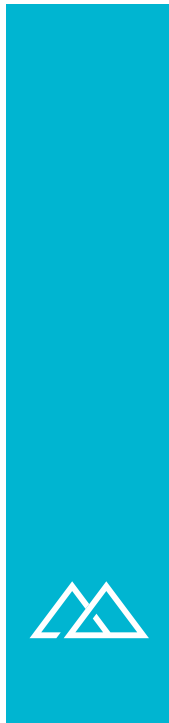

The Original Liability Solutions Company

Summit was originally built and strategically designed to professionally manage the environmental requirements and end-of-life liabilities of today's oil and gas industry. Our turnkey, full life-cycle approach and abilities makes us a uniquely qualified and diversely capable service partner. From project planning to end-of-life asset management Summit can manage your environmental liabilities with integrity.

End-of-life liability management was one of the founding pillars of our business plan and key focus since 2005. We have evolved as a business and developed into a fully integrated professional consulting and environmental services company purposely designed through focus, strategic acquisitions, partnerships and a vision to provide turnkey liability management and on-site services across the entire oil and gas life cycle.

MANAGING YOUR ENVIRONMENTAL LIABILITIES WITH INTEGRITY

Summit was incorporated in 2005 and though we have evolved as a company our original tagline "managing your environmental liabilities with integrity" is as fundamental to our core today as it was when we first started.

Original Summit Logo 2005

We Bring our Insight, On-site

Many of Canada's premier upstream and midstream oil and gas companies trust Summit's pragmatic and innovative environmental solutions to support their operations, facilities, and development projects. We provide a vast array of professional consulting and on-site services that span the entire life-cycle of oil and gas projects – from planning, monitoring, construction, drilling, production, operation, site closure, decommissioning, remediation, reclamation, risk management through to end-of-life. We possess the skills, experience, and technical capabilities to be a valued partner on the most challenging projects.

Uniquely Summit

Summit has built a world-class consulting and on-site services company through purposeful and thoughtful actions. We have focused on what makes Summit unique and fostered these through a core focus, values and strategic acquisitions

Strategically Diversified & Integrated

We possess a diverse set of skills, expertise and service capabilities that are unmatched by our peers. These are smartly integrated to allow distinct or turnkey execution based on the project and client requirements

Personable & Responsive

We take pride in our well-earned reputation for being personable and responsive at every level – starting with our founders. We promote these values throughout our culture, and we hire people who embody them.

Progressive

We have always been innovative and forward-looking. We advocate for progress, change, and continuous improvement, and we challenge the status quo. The evolution of our company and the innovations we have patented or embraced along the way are evidence of our determination to always progress.

**Evolving, to Exceed
Your Expectations.**
